INTRODUCTION

This publication was prepared by the Research and Analysis Section of the Employment Security Division of the Arkansas Department of Labor as one of its responsibilities to provide needed labor force statistics to the many agencies and organizations throughout the State that are involved in area analysis and economic development planning.

Estimates in this publication are based on revised procedures developed by the Bureau of Labor Statistics. The purpose of these revised procedures is to make unemployment estimates more accurate by using more current data from the household survey and improved inputs from the state unemployment insurance programs. They are also designed to make estimates more comparable from State to State and to bring state and area estimates more closely into line with the national unemployment statistics. The effect of these changes has created a "break in series" for most areas, as many of the new inputs are not available for earlier periods.

Statistics in this publication supersede any other similar data previously published for 1975 through 1981 by this agency and are not comparable with any similar data published for years prior to 1975.

Labor area boundaries as designated in this publication have been defined by the United States Department of Labor, and all labor force statistics have been prepared using standard technical methodology developed and provided by the Bureau of Labor Statistics, United States Department of Labor. Area employment and unemployment estimates have been adjusted to be consistent with the independently estimated state totals.

Standard Metropolitan Statistical Areas. The map on page one indicates the four designated Standard Metropolitan Statistical Areas in Arkansas during 1981. They are Fayetteville-Springdale, Fort Smith, Little Rock-North Little Rock and Pine Bluff. Also shown on the map are three counties, Crittenden, Little River, and Miller, which are part of the Memphis, Tennessee–Arkansas and Texarkana, Texas–Arkansas SMSA's, respectively.

Labor force data for the Memphis, Tennessee–Arkansas SMSA is prepared by the Tennessee Department of Employment Security and labor force data for the Texarkana, Texas–Arkansas SMSA is prepared by the Texas Employment Commission.

Data for these SMSA's can be obtained by contacting the respective state agencies at the following addresses:

DEFINITIONS

Annual Average – The sum of the data for the week of reference in each month of the year divided by 12.

Week of Reference – The week which includes the 12th of the month.

Total Civilian Labor Force – Represents the number of persons, on a place-of-residence basis, who were employed, unemployed or involved in labor-management disputes. Members of the Armed Forces are excluded from the estimate of the civilian labor force.

Unemployment – An estimate of the average number of persons who, for the entire week of reference, did not work at all, were able to work and available for work, and (1) were looking for work, or (2) would have looked for work except that (a) they were waiting to return to a job from which they had been laid off, or (b) they were waiting to report to a new job.

Unemployment Rate – The average number of unemployed workers as a percentage of the average civilian labor force.

Employment – An estimate of the average number of persons, on a place-of-residence basis, who worked any time for pay or profit or worked 15 hours or more as an unpaid family worker during the week of reference. Also included are those who, although not working, had some job attachment and were not looking for work, and persons involved in labor-management disputes.

Agricultural Employment – An estimate of the average number of persons who worked on farms and received pay or profit during the reference week. Also included are unpaid farm family workers who worked 15 or more hours during the week.

Domestic Service, Self-Employed and Unpaid Family Workers – An estimate of the average number of nonagricultural workers who were employed as domestics in private households, were self-employed, or worked as an unpaid worker in a family owned establishment.

Nonagricultural Wage and Salary Employment – The average number of full and part-time nonfarm workers who worked during or received pay for any part of the week of reference. This series is on a place-of-work basis.

August 1983

INTRODUCTION

This publication was prepared by the Research and Analysis Section of the Employment Security Division of the Arkansas Department of Labor as one of its responsibilities to provide needed labor force statistics to the many agencies and organizations throughout the State that are involved in area analysis and economic development planning.

Estimates in this publication are based on revised procedures developed by the Bureau of Labor Statistics. The purpose of these revised procedures is to make unemployment estimates more accurate by using more current data from the household survey and improved inputs from the state unemployment insurance programs. They are also designed to make estimates more comparable from State to State and to bring state and area estimates more closely into line with the national unemployment statistics. The effect of these changes has created a "break in series" for most areas, as many of the new inputs are not available for earlier periods.

Statistics in this publication supersede any other similar data previously published for 1975 through 1982 by this agency and are not comparable with any similar data published for years prior to 1975.

Labor area boundaries as designated in this publication have been defined by the United States Department of Labor, and all labor force statistics have been prepared using standard technical methodology developed and provided by the Bureau of Labor Statistics, United States Department of Labor. Area employment and unemployment estimates have been adjusted to be consistent with the independently estimated state totals.

Standard Metropolitan Statistical Areas. The map on page one indicates the four designated Standard Metropolitan Statistical Areas in Arkansas during 1982. They are Fayetteville-Springdale, Fort Smith, Little Rock-North Little Rock and Pine Bluff. Also shown on the map are three counties, Crittenden, Little River, and Miller, which are part of the Memphis, Tennessee–Arkansas and Texarkana, Texas–Arkansas SMSA's, respectively.

Labor force data for the Memphis, Tennessee–Arkansas SMSA is prepared by the Tennessee Department of Employment Security and labor force data for the Texarkana, Texas–Arkansas SMSA is prepared by the Texas Employment Commission.

Data for these SMSA's can be obtained by contacting the respective state agencies at the following addresses:

DEFINITIONS

Annual Average – The sum of the data for the week of reference in each month of the year divided by 12.

Week of Reference – The week which includes the 12th of the month.

Total Civilian Labor Force – Represents the number of persons, on a place-of-residence basis, who were employed, unemployed or involved in labor-management disputes. Members of the Armed Forces are excluded from the estimate of the civilian labor force.

Unemployment – An estimate of the average number of persons who, for the entire week of reference, did not work at all, were able to work and available for work, and (1) were looking for work, or (2) would have looked for work except that (a) they were waiting to return to a job from which they had been laid off, or (b) they were waiting to report to a new job.

Unemployment Rate – The average number of unemployed workers as a percentage of the average civilian labor force.

Employment – An estimate of the average number of persons, on a place-of-residence basis, who worked any time for pay or profit or worked 15 hours or more as an unpaid family worker during the week of reference. Also included are those who, although not working, had some job attachment and were not looking for work, and persons involved in labor-management disputes.

Agricultural Employment – An estimate of the average number of persons who worked on farms and received pay or profit during the reference week. Also included are unpaid farm family workers who worked 15 or more hours during the week.

Domestic Service, Self-Employed and Unpaid Family Workers – An estimate of the average number of nonagricultural workers who were employed as domestics in private households, were self-employed, or worked as an unpaid worker in a family owned establishment.

Nonagricultural Wage and Salary Employment – The average number of full and part-time nonfarm workers who worked during or received pay for any part of the week of reference. This series is on a place-of-work basis.
